

One of the things that I've found is that the Zoom screen can be configured a number of ways, depending on what you want. Please experiment when you get the chance.

This is my preferred layout. It shows who is in the Zoom call, and it keeps all the chat messages and controls out of the main presentation.

I'm able to configure Zoom like this with a couple of simple mouse clicks.

First, I maximize the Zoom window using the operating system controls. Obviously this is a Windows screen, so for a Mac use the corresponding button on the top-left side.

Second, I click on the Participants button, then the Chat button.
